TELLUN CORP

VEEBLEFETZER

All dimensions in inches.

Panel Size: 1.75" (W) x 8.75" (H)

Display Bezel Cutout: 1.0625" (W) x 3.875" (H)

Notes

1. The two jacks are on the standard MOTM grid.
2. The two switches above the jacks are on the standard grid (1 inch above the jacks).
3. The single pot is 1.333 inches above the centre of the switches. This pot is not on the standard grid. I had to move the pot slightly higher so that the pot labels didn't interfere with the switch labels. That leaves just enough space to fit in the display bezel and have 1/2 inch blank space at the top of the panel (for mounting panel to a cabinet).
4. The top of the display bezel cutout is 5/8" from the top of the panel.
5. The display bezel is 4 and 1/8 inch tall by 1 and 5/16 inch wide (outside dimensions as seen when it's mounted in a panel). The hole required in the panel is 3 and 7/8 inch tall by 1 and 1/16 inch wide. The bezel overlaps the hole by 1/8" on all four sides.

Hole Sizes:

1. 1 pot: 3/8".
2. 2 switches: 1/4".
3. 2 jacks: 3/8".
